Graduate Committee

Dear Committee,

The Molecular and Cellular Biology program would like to terminate the PSM in Applied Biotechnology. The administration of the Professional Science Master's programs was shifted to the individual departments starting Fall 2014. The MCB faculty is not interested in continuing to offer this degree type within the MCB program. Instead the MCB program intends to pursue MS-based degree programs on campus. Terminating the PSM in Applied Biotechnology program will not result in the termination of any current or future MCB courses.

There is currently one student in the PSM in Applied Biotechnology program. She is on track and expected to graduate Spring 2015. We have not accepted any new applications and no new students have been admitted to the program for Fall 2015.

Yours sincerely

Prof. Dee Denver
MCB Director
