RE: Termination of the PSM in Applied Biotechnology

This proposal is to terminate the PSM in Applied Biotechnology. The administration of the PSM programs was shifted to the individual departments as of Fall 2014. There is little interest in continuing to offer this degree type in our department. The MCB Program has decided to pursue MS-based degree programs on campus and therefore would like to terminate the PSM in Applied Biotechnology.

One student is currently enrolled in the PSM in Applied Biotechnology program. She is expected to graduate Spring 2015. No new applications were accepted and no new students are enrolled for Fall 2015.

Sincerely,

Dee Denver
Molecular and Cellular Biology Program Director
Oregon State University
Corvallis, OR 97331

CIP number for this PSM program is 26.1201.
